

Unified Facilities Guide Specifications (UFGS)

[\(/ccb/ccb.php\)](/ccb/ccb.php)

UFGS Master Updated February 13, 2013; Posted February 26, 2013

As of June 2008, updated UFGS will be posted quarterly in February, May, August and November.

Unified Facilities Guide Specifications (UFGS) are a joint effort of the **U.S. Army Corps of Engineers** (<http://www.hnc.usace.army.mil/Missions/EngineeringDirectorate/TECHINFO.aspx>) (USACE), the **Naval Facilities Engineering Command** (/references/pa_dod_cieng.php) (NAVFAC), the **Air Force Civil Engineer Center** (<http://www.afcec.af.mil/>) (HQ AFCEC) and the **National Aeronautics and Space Administration** (<http://www.nasa.gov/about/highlights/index.html>) (NASA). UFGS are for use in specifying construction for the military services.

The Unified Facilities Guide Specifications (UFGS) are published only in electronic format and are intended to be used with **SpecsIntact** (</tools/specsintact.php>) software. The UFGS Master uses the latest CSI MasterFormat, therefore, as of January 2012, the UFGS Working Group decided to discontinue support of MasterFormat 1995. SpecsIntact version 4.5.1 and above will support MasterFormat 2010 and will no longer support the creation of Jobs or Masters using the old MasterFormat 1995 UFGS Master. For backward compatibility, Masters or Jobs created with older versions can still be opened using the latest software versions.

For Specsintact Technical Support, please contact them directly:

Phone: 321-867-8800, E-mail(<mailto:KSC-SpecsIntact@nasa.gov>), or visit their Website (<http://specsintact.ksc.nasa.gov>)

In addition, the **SpecsIntact Knowledge Base** (<http://specsintact.ksc.nasa.gov/KnowledgeBase/TechHelp.htm>) can be found on their website. This is the first resource recommended for those who encounter any problems while using SpecsIntact, including those having problems publishing to Word or PDF formats.

UFGS that have been unified for use by all participating agencies have a level 3 or level 4 MasterFormat™ number. UFGS that are agency-specific have a fifth level number indicating it as an agency specific specification. A specification that has a fifth level number "10" indicates USACE, a "20" indicates NAVFAC, a "30" indicates AFCEC, and a "40" indicates NASA. Preparing agencies are indicated in the UFGS header of each specification. **Users of UFGS should first consider a unified UFGS if one is available, next a UFGS identified as specific to their agency and lastly a UFGS identified as specific to another agency.**

Points of contact and procedures for the development and maintenance of UFGS documents are prescribed in the latest edition of **MIL-STD-3007** (</ccb/FEDMIL/std3007f.pdf>).

Section templates for MasterFormat 2010 and MasterFormat 1995

(<http://specsintact.ksc.nasa.gov/Software/templates.shtml>): These templates are provided to assist the user in creating a new section.
